

SpilMax® Chemical Workplace Spill Kits are designed to act as a portable spill control station. Ideal for areas where hazardous liquids are stored or used such as workshops, warehouses, factories and decanting areas. The wheelie bin is easy to walk to the spill location.

The polypropylene absorbents in the Chemical Spill Kit will pick up water, oils, fuels, diesel, coolant, general workplace chemicals, common agricultural chemicals, strong oxidisers, acids, alkalis and caustics.

SpilMax® Zeolite Floor Sweep has a strong wicking action, absorbs immediately on contact and absorbs a wide variety of hazardous liquids.

Spill kit instructions are on the outside of the bin for easy reference.
