ABSORBENT SPILL MAT

SUITABLE FOR OIL AND FUEL, HYDROCARBONS AND DIESEL

The absorbent spill mat is an easy, convenient and portable way to capture drips, minor spills and leaks.

The PVC base provides an impermeable layer to capture contaminants. It also provides protection from rocks and dirt on the ground. This mat is reusable simply replace the used absorbent when saturated.

Spill mats are weighted on two sides to maintain their position when deployed.

Each spill mat can be easily rolled up and stored using the attached tabs and handles.

APPLICATIONS:

- Refuelling and coupling stations
- Hydraulic hose bleeding
- Vehicle and equipment servicing

SPECIFICATIONS:

Carry handle can be used to hang the spill mat. Eyelets can be used to peg the mat into position. Velcro closure.

Top Layer Knitted HDPE mesh with 10 year UV resistance

Middle Layer Replaceable 400gsm hydrophobic polypropylene absorbent

Base Layer Heavy-duty 610gsm PVC
