

The SpilMax<sup>®</sup> range of absorbents have undergone extensive testing to ensure their absorbency and performance.

SpilMax<sup>®</sup> Oil & Fuel Cotton Organic Absorbent Pads are capable of absorbing a wide range of substances, including plant and seed oils, hydrocarbons, petrochemicals, and petroleum-based solvents.

These pads are simple, lightweight, and easy to use. Made from sustainably sourced cotton, they are both biodegradable and organic. Their hydrophobic properties make them perfect for absorbing liquids around water and in wet conditions.

Each pad absorbs 1L per saturation. Pads can be wrung out and reused many times during spill clean up.

Even when fully saturated, these pads will float on water. They are ideal for use with spills in waterways, and for use on boats, in marinas, on wet worksites and in or near stormwater outlets.

Rolls of perforated pads will tear off in custom sized sheets ideal for use under vehicles and equipment during maintenance or refueling and to create set down areas for containers or leaking equipment. Single pads can be used to capture small leaks, clean up small spills and wipe down tools, equipment or drum tops.

**TESTING:** ASTM Test Method F726-06 “Sorbent Performance of Absorbents” to test maximum oil capacity.

CODE	GSM	SIZE	QUANTITY	WEIGHT
CH2320	400gsm	480mmL x 430mmW	box of 100	10 kg
CH2327	200gsm	480mmL x 430mmW	box of 100	10 kg
