

The SpilMax[®] range of absorbents have undergone extensive testing to ensure their absorbency and performance, even when under extreme industrial use.

SpilMax[®] Oil & Fuel absorbents will absorb a wide variety of plant and seed oils, hydrocarbons, petrochemicals and petroleum-based solvents. Because the pillows are hydrophobic and repel water, they are an ideal absorbent for use around water and in wet conditions.

SpilMax[®] absorbent pillows are made of sustainably sourced cotton. Each pillow can absorb up to 4L per saturation. They are

typically used to catch drips under leaking equipment or machinery. They can also be stuffed into an area where liquids are flowing as a temporary measure until the flow is stopped.

TESTING:

ASTM Test Method F726-06 "Sorbent Performance of Absorbents" to test maximum oil capacity.

CODE	SIZE	BOX QTY	DIMENSIONS	WEIGHT
CH2315	350mmL x 450mmW x 50mmH	10	0.51mL x 0.41mW x 0.41mH	6 kg
